10 Gigabit Optical Module Interface Standard

Overview

10GBASE-LR is a 10-gigabit Ethernet optical standard that operates at 1310 nm over single-mode fiber (SMF), supporting link distances of up to 10 km. It is typically implemented using SFP+ transceivers and defined under IEEE 802. 10G-LR module has become one of the most widely. 10 Gigabit Ethernet (10GE, 10GbE, or 10 GigE) is a group of computer networking technologies for transmitting Ethernet frames at a rate of 10 gigabits per second. For example, SFP-10G-BXD1 must be used with SFP-10G-BXU1. If the SFP-10G-ER-1310 is connected. Once an exotic, high-end technology, 10GbE is now mainstream and widely deployed both in the datacenter and in the campus environment. 10 Gigabit Ethernet, however, has had a fairly lengthy process of development to get to where it is now, and with many older 10GbE platforms and modules still in. The Cisco® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications.

What Is 10GBASE-LR? SMF 1310nm 10km SFP+ Explained

10GBASE-LR is a 10-gigabit Ethernet optical standard that operates at 1310 nm over single-mode fiber (SMF), supporting link distances of up to 10 km.

10 Gigabit Ethernet

OverviewPhysical layer modulesOptical fiberCopperWAN PHY (10GBASE-W)

To implement different 10GbE physical layer standards, many interfaces consist of a standard socket into which different physical (PHY) layer modules may be plugged. PHY modules are not specified in an official standards body but by multi-source agreements (MSAs) that can be negotiated more quickly. Relevant MSAs for 10GbE include XENPAK (and related X2 and XPAK), XFP and SFP+. When choosing a PHY

10GE SFP+ Optical Modules

If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength

OEM 10GbE Optics Cheat Sheet | Tech Guide | Curvature

Curvature offers OEM optics cheat sheet that provides details such as module types and optical standards of 10GbE XENPAKs optics from the OEM.

Cisco 10GBASE SFP Modules Data Sheet

The Cisco 10GBASE-LRM Module supports link lengths of 220m on standard Fiber Distributed Data Interface (FDDI) grade multimode fiber (MMF). To make sure that specifications are met over FDDI

10G SFP+ Industrial Active Optical Cables Datasheet| FS

The module is a Single-Channel, Pluggable, Fiber-Optic SFP+ for 10 Gigabit Ethernet and Infiniband EDR Applications. These modules are designed to operate over multimode fiber systems using a

Cisco SFP-10G-LRM Datasheet

The Cisco 10GBASE SFP+ modules give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider transport applications. Features and

10 Gigabit Ethernet PCS/PMA (10GBASE-R)

© 2026 EXF OPTICAL NETWORKS - All rights reserved

AMD provides the 10 Gigabit Ethernet PCS/PMA (10GBASE-R) IP core with integrated serial interface to ensure first time success in your design.

Optic Modules Datasheet

datasheet is intended to guide the user through the various options available when choosing an optic module for a given platform depending on the architecture. The following table lists the different

Optical Modules Market Research Report 2034

Optical Modules Market Outlook 2025-2034 The global optical modules market was valued at $14.8 billion in 2025 and is projected to reach $39.6 billion by 2034,

Cisco SFP Modules for Gigabit Ethernet Applications

Cost-effective Small Form-Factor Pluggable (SFP) transceivers for Gigabit Ethernet applications Product overview The industry-standard Cisco

Cisco Optics | Transform Your Network

Get the highest quality, performance-leading optical transceivers for any network architecture. Find the transceiver model to fit your network.

Optcore 10GBASE-SR SFP+ 850nm 300m OM3 Fibre Transceiver Module

Overview Summary Optcore 10GBASE-SR SFP+ transceiver module delivers reliable 10 Gigabit Ethernet connectivity over OM3 multimode fibre up to 300 metres. Designed for enterprise

Cisco C9300L-48P-4X-E 48-Port PoE+ Gigabit Switch

Enterprise-grade 48-port PoE+ Gigabit switch with 4x10G SFP+ uplinks, StackWise-320, and up to 1440W power budget. Ideal for IoT and Wi-Fi 6 deployments.

800G Client Optics in the Data Center

The next key development is 800G, and the industry is already gearing up to deploy this next generation of client optics in hyperscale data centers. Developments in three distinct areas are needed for 800G

Specification sheet (buy online): OPT-SFP-300M-10G-DPX Optcore

The OPT-SFP-300M-10G-DPX module also includes an enhanced digital diagnostic monitoring interface compliant with SFF-8472, enabling real time tracking of key operating parameters such as

An introduction to SFP ports on a Gigabit switch

© 2026 EXF OPTICAL NETWORKS - All rights reserved

An SFP module, or transceiver, acts as a converter between the network switch and a fiber optic or Ethernet cable. For example, it converts electrical signals to optical signals for fiber

Arista Optics Modules and Cables

All interface speeds, from 1G to 400GE have connectivity options that include Direct Attach copper Cables (DACs), Active Optical Cables (AOCs), multi-mode fiber and single-mode fiber transceivers.

Additional source notes

To implement different 10GbE physical layer standards, many interfaces consist of a standard socket into which different physical (PHY) layer modules may be plugged. PHY modules are not specified in an official standards body but by (MSAs) that can be negotiated more quickly. Relevant MSAs for 10GbE include (and related X2 and XPAK), and .
