12-core stranded optical cable and bundle tube

Overview

High-quality LC-LC multi-mode OM4 Loose Tube installation outdoor cable for laying in a tube above- or underground. From a length of 100 meters, the fiber optic outdoor cables will be. 12 Core GYTC8S Fiber Optic Cable Armor Stranded Loose Tube Steel Wire Strength Waterproof Figure 8 Self Supporting Outdoor GYTC8S is a typical self supporting outdoor fiber optic cable, suitable for aerial applications; The cable have nice moisture resistance performance and crush resistance. Quick shipment of 12-strand fiber in any length! Choose connectors and jacket type. Choose Connectors, Jacket Type, and Optional Pulling Eye. The central reinforcement of the cable core is a steel wire (a large core number structure optical cable needs to be extruded with a layer. Shop high-quality 12 core fiber optic bundle cables for reliable data transmission. Bulk orders and customized lengths available from trusted suppliers. Commonly used outdoor optical cables are divided into two structures: central bundle tube type and layer stranded optical cable: ① Central tube optical cable: The center of the optical cable is a loose tube, and the strengthening member is located around the loose tube. The fibers are protected from environmental conditions (lightning, short circuit, loading) to ensure reliability and longevity.
