A parent-child router can use fiber optic cable

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. After testing 15 different routers over 6 months and spending over $2,000 on various solutions, I've discovered that the TP-Link Archer BE230 is the best router with parental controls for 2026 due to its WiFi 7 future-proofing and comprehensive HomeShield parental control system. I currently have ZIPLY fiber and their router and software are subpar. My old ASUS router allowed me to label each device. Whether blocking inappropriate content, managing screen time, or simply ensuring that your children are taking their lectures and not watching random streams, a parental control router is the best way to let your kids access the internet without any worries. No, it's not cheap, and yes, it's built for gamers. We. This article provides step-by-step instructions for configuring Parental Controls on a TP-Link ISP-customized modem router. Choose the age group of your child, select an avatar, and proceed by clicking Next.
