AI server cancels orders

Overview

Oracle reportedly canceled a major AI hardware order from Super Micro, impacting investor confidence. Supermicro faces legal scrutiny, potentially undermining trust and its AI infrastructure growth story. In mid-April 2026, Super Micro Computer disclosed new compact, energy-efficient edge AI systems built on AMD's EPYC 4005 “Zen 5” processors, targeting constrained retail, manufacturing, healthcare, and branch environments with enhanced security, remote management, and optional GPU acceleration. Amazon just did something unprecedented: they're forcing a 90-day safety reset across 335 critical systems after their AI coding tool caused catastrophic outages. The March 5th incident alone lost 6. 3 million orders and triggered 21,716 peak Downdetector reports. The same SVP.
