Arch-shaped outward-turning cable tray

Overview

Arc-shaped cable trays are cable trays with an arc-shaped structure. Adaptable to curved cabling: They perfectly fit curved shapes in circular buildings, stadiums, theaters, and other locations, making cable laying smoother and avoiding cable stress caused by right-angle bends. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Fast installation – Reduce installation costs with quick and efficient. Constructed from high-quality welded steel wire, Cablofil® Wire Mesh Cable Tray is the result of decades of research and over 94,000 miles of installed tray across the globe.
