Are American galvanized cable trays customizable

Overview

Cable Trays | EAE USAThese trays, meeting sector-specific needs with a robust structure, feature a covered design, interlocking splicing options, and wire.

Key Takeaways

Yes, American galvanized cable trays are highly customizable to meet specific project requirements.

Made-to-

Order Options

Manufacturers like Atkore's US Tray produce made-to-order cable trays that are built according to NEMA standards and UL certified. These trays can be tailored to your application demands, including dimensions, tray type (ladder, basket, I-beam, or C-channel), and additional accessories such as covers and wire management components, ensuring compliance with industry standards while meeting unique installation needs.

Material and Size Flexibility

Galvanized cable trays are available in pre-galvanized, electro-galvanized, or hot-dipped galvanized steel, suitable for both indoor and outdoor environments. Standard lengths are typically 9. 84 feet, but longer lengths up to 19.

68 feet can be manufactured upon request. Widths and load capacities can also be customized to accommodate high cable density or specific structural requirements.

Modular and Adjustable Features

Many cable tray systems, including those from MP Husky and WireRun, offer modular designs that allow for field adjustments. Wire basket trays, ladder trays, and channel trays can be modified using accessories, splicing options, and self-latching mechanisms to fit irregular layouts or complex installations. This modularity ensures that trays can be adapted without extensive cutting or rework on-site.

Industry Compliance and Support

Customizable trays are designed to meet or exceed NEMA, UL, CTI, and CSA standards, ensuring safety and reliability in industrial, commercial, and high-density cabling environments. Manufacturers often provide technical support for design, installation, and logistics, helping engineers and contractors optimize tray layouts and material selection.

Summary

American galvanized cable trays are not only customizable in terms of size, material, and type, but also in modular features and accessory integration. Whether for industrial, commercial, or specialized applications, these trays can be tailored to meet project-specific requirements while maintaining compliance with industry standards.
