Armenian KVM Switch Manufacturer

Overview

The firm has expanded its dealer network and it is constantly evolving, providing computer equipment and technical support in the city of Yerevan, and in most areas of Armenian Republic.

Key Takeaways

Currently, there are no confirmed KVM switch manufacturers based in Armenia; local options are primarily distributors and resellers. Local Suppliers and DistributorsLED Computers is a Yerevan-based company providing a wide range of computer equipment and technical support across Armenia. While they offer networking and computer hardware, there is no evidence that they manufacture KVM switches locally.

They focus on retail and corporate sales, including delivery services throughout the country. Microless is an online electronics store that delivers to Armenia, including Yerevan, Gyumri, and Vanadzor. They offer a variety of KVM switches for home and office use, but these products are sourced from international manufacturers rather than produced in Armenia.

International Brands Available in Armenia

Armenian distributors often carry KVM switches from well-known global manufacturers such as Dell, Raritan, and IEC. These brands provide both passive and active KVM switches suitable for industrial, commercial, and IT infrastructure applications. Local stores and online platforms facilitate access to these products with warranty and delivery options.

Summary

While Armenia has a growing IT and electronics market, there is no evidence of a native KVM switch manufacturer. Interested buyers should rely on local distributors like LED Computers or Microless to purchase international KVM switch brands with local support and delivery. For specialized or custom KVM solutions, contacting international manufacturers directly may be necessary.
