As-built drawing of optical fiber cable

Overview

This document summarizes the key components and purpose of a fiber optic project's as-built drawing. The as-built drawing contains information on the actual implemented fiber route, including manhole locations, distances, terrain details, site coordinates, and landmarks. In a Fiber Project drawing documents are taken serious. We're proud to have successfully delivered engineering drawings for over 15,000 copper wire projects for. Clients from Belgium, US, Canada, Australia, Ireland, & UK Our expert OSP Network Designers in FTTH, FTTx designs and standards enables us to provide top quality services to EPC companies all. The installation of fiber optic infrastructure requires detailed fiber optic route survey drawings that describe the type of communication systems required, the geographic layout, the transmission equipment to be used, and the required fiber optics network, as well as terrain details, obstacles. Be among the first to receive important product updates, insights and news. An updated version of this booklet is now available as a textbook on Amazon, is included in the FOA Reference Guide to Outside Plant Fiber Optics and as a section in the FOA Guide website.
