ASEAN Flame-Retardant Cable Tray Manufacturers

Overview

Cable tray manufacturers in UAE and cable tray suppliers in Dubai provide fire-resistant trays and cable tray accessories that ensure safety, durability, and compliance.

Key Takeaways

Leading ASEAN manufacturers of flame-retardant cable trays include Ferrotech (Singapore), NewReach, and Prysmian Group, offering fire-rated, durable, and standards-compliant solutions.

Key Manufacturers in ASEAN

Ferrotech (Singapore) Ferrotech specializes in FRP (fiberglass-reinforced plastic) cable trays with premium fire-retardant resins, providing high strength, corrosion resistance, and fire safety. Their trays are suitable for harsh environments such as chemical plants, refineries, and marine applications. Options include Isophthalic Polyester (IFR) for Class 1 fire rating according to ASTM E84, and Vinyl Ester resin for enhanced fire retardancy.

The trays are non-conductive, UV-resistant, and provide good electrical insulation, making them ideal for critical infrastructure projects.

New

Reach New

Reach manufactures fire-rated cable trays designed to withstand high temperatures and prevent flame propagation. Their products include powder-coated aluminum, galvanized steel, and fiberglass trays with intumescent coatings, ensuring compliance with ISO 834-1, EN 1363-1, DIN 4102-12, and AS/NZS 3013: 2005 standards. These trays maintain circuit integrity for emergency systems such as fire alarms and emergency lighting, offering up to 2-hour fire ratings at 1050°C.

They are suitable for both indoor and outdoor installations and support heavy cable loads. Prysmian Group (Regional Operations) Prysmian operates extensively across ASEAN with manufacturing plants in Malaysia, Indonesia, the Philippines, and Thailand, and a regional distribution center in Singapore.

Their MA

X FOH™ fire performance cables are insulated with Low Smoke Halogen Free (LSHF) materials and multi-layered mica fire barrier tape, meeting international fire safety standards. While primarily a cable manufacturer, Prysmian provides integrated solutions for cable management systems, including fire-rated trays and accessories, ensuring reliable performance in critical safety applications.

Considerations for Choosing ASEAN Flame-

Retardant Cable Trays

Material and Fire Rating: FRP, galvanized steel, or aluminum with certified fire-retardant coatings. Compliance: Ensure adherence to ISO, ASTM, EN, DIN, or local SNI standards. Environmental Resistance: UV, moisture, chemical, and corrosion resistance for tropical climates.

Load Capacity and Design: Support heavy cable loads while maintaining structural integrity. Application: Industrial plants, hospitals, airports, offshore facilities, and high-rise buildings. These manufacturers provide robust, fire-safe, and durable cable tray solutions suitable for diverse ASEAN infrastructure and industrial projects, ensuring compliance with international safety standards and operational reliability.
