# Benin sells large quantities of optical fiber cables

## Overview

Benin Optical Fiber Cables Market (2026-2032) | Trends, Outlook6Wresearch actively monitors the Benin Optical Fiber Cables Market and publishes its compreh.

## Key Takeaways

Benin is primarily an importer of optical fiber cables and does not sell large quantities internationally.

### Import Activity

Benin imports significant amounts of optical fiber cables to meet domestic demand. In 2023, the country imported 337,599 kg of optical fiber cables valued at approximately $6. 06 million, with the majority coming from China ($5.

47 million, 303,711 kg), followed by France, the UAE, the UK, and India. The market for optical fiber cables in Benin has seen strong growth over the past few years, with a compound annual growth rate (CAGR) of 71. 14% between 2020 and 2024, although there was a temporary decline in 2023-2024.

Export ActivityBenin's exports of optical fiber cables are minimal. In 2021, the total value of exports in this category was only $201,000, representing a tiny fraction (0. 019%) of the country's total exports.

This indicates that Benin is not a major supplier of optical fiber cables on the global market.

### Market Implications

The data shows that Benin relies heavily on imports to supply its domestic telecommunications and infrastructure sectors. While the country has growing demand for optical fiber cables, it does not produce or export large quantities, and its trade activity is dominated by imports from major manufacturing countries like China and France. Businesses looking to source optical fiber cables from Benin would find limited availability for export purposes.

In summary, Benin is a net importer rather than a significant exporter of optical fiber cables, and its domestic market growth is driving import demand rather than international sales.
