C300 optical module transmission distance

Overview

It also offers flexible Transmission Distance options, ranging from 10km to 120km, to meet the varying needs of different network setups and distances. This makes it suitable for both short and long-range communication applications. Providing cutting-edge solutions that facilitate high-speed, reliable, and scalable fiber optic connectivity suitable for urban, rural, and industrial. About This Manual Purpose The ZXA10 C300 Optical Access Convergence Equipment (ZXA10 C300 for short) is a full-service optical access platform. It supports the video, data, voice, TDM, and CATV services. The ZXA10 C300 can be connected with MDUs/ONUs/ONTs through various networking technologies. It offers 16/14 service card slots for GPON/P2P/XG-PON1, supporting up to 16384 GPON subscribers. It features multiple uplink interfaces, including GE and 10GE options, and supports various management interfaces and physical transmission distances of 20Km~60Km. 0 ZXA10. ZXA10 C300, the world's first future-proof and largest capability optical access platform, is developed with mass optical access roll-out as well as economy in mind.
