Cambodia installs 100G optical receiver

Overview

Alcatel-Lucent (Euronext Paris and NYSE: ALU) and the operator Chuan Wei are to deploy Cambodia's first 100 gigabit-per-second fiber-optic data network as the country invests further in communications infrastructure to meet increasing demand for ultra-broadband access. With Cambodia's economy growing at more than 7%. Cambodian Internet Service Provider (ISP), Chuan Wei in its bid to build a high speed ultra-broadband backbone for its network, has partnered with Alcatel-Lucent to deploy the company's 100Gbps DWDM solution. The deployment is expected to support the high growth in the country's broadband traffic. As of early 2023, fixed internet subscriptions were about 310,000 nationwide, underscoring a mobile-first connectivity pattern.
