China s ADSS fiber optic cable

Overview

You gain latest optical fiber specifications, tracking top market trends, and direct wholesale access for competitive pricing. For industry-leading electrical buyers, submit an inquiry to check availability.

Key Takeaways

ADSS fiber optic cable from China is an All-Dielectric Self-Supporting cable designed for overhead installation along power lines, offering durability, long spans, and a 30-year service life. OverviewADSS stands for All-Dielectric Self-Supporting, a type of fiber optic cable that does not contain metal elements, allowing it to be installed along high-voltage power lines without electrical interference. It is widely used by electrical utilities and telecommunication companies for reliable communication along existing transmission structures.

Structure and Features

S cables typically have a loose tube stranded design with multiple layers for strength and protection: Optical fibersFiber jellyPBT loose tubeFilling compoundCentral strength member (FRP)Filling ropePE inner sheathAramid yarnOuter sheath (corrosion-resistant, AT sheath for >12kV) Key advantages include: Lightweight and small diameter, reducing ice and wind load on towersLong span capability, often exceeding 1000 meters, allowing installation without power outagesDurability, with a service life of up to 30 yearsHigh mechanical strength, suitable for harsh outdoor environments ApplicationsADSS cables are primarily used for: Communication along overhead power linesIntegration with existing electrical infrastructureLong-distance telecommunication projects where direct burial is not feasibleManufacturing and ProcurementChina hosts numerous ADSS cable manufacturers, such as Oufu Communication Cable, ZTO Fiber Cable, and SL Reliance Ltd.

Key points for procurement: Production capacity: Some factories can produce up to 10 million km of fiber optic cables annually Roll length: Typically 3–4 km per roll; container capacity ranges from 120 km (20-foot) to 260 km (40-foot)Customization: OEM options allow specification of fiber core, diameter, and other parameters for large-scale projects Delivery: Production cycles are usually 2–3 weeks, depending on order size Advantages of Sourcing from ChinaCompetitive pricing through direct factory OEM distributorsAccess to latest optical fiber specifications and customizationReliable supply for large-scale electrical and telecommunication projects Chinese ADSS fiber optic cables combine robust design, long service life, and cost-effective manufacturing, making them a preferred choice for utility and telecom applications worldwide.
