China Unicom ODB Fiber Optic Connection

Overview

Engineered by telecom giant China Unicom in partnership with Huawei, the service delivers a verified downstream speed of 9,834 Mbps, 1,008 Mbps upstream, and latency as low as 3 milliseconds—establishing China as a clear leader in ultra-high-speed internet infrastructure. Meeting ISO, IEC, TIA/EIA and UL standards, our components and total solutions are suitable for specialized applications in ICT technologies. The pace of innovation in computer and network science has become very significant in the recent century so that new technologies rise every day with the new. China United Network Communications Group Co., doing business as China Unicom, is a Chinese state-owned telecommunications operator. Originally founded in 1994 as a wireless paging and GSM mobile operator, it currently provides a range of services including mobile network, long-distance &. ies, supporting CDSA business development. It has accumulated rich experience and fruitful results in computing power delivery, computing power dispatch, computing and high-quality IDC business developm computing, storage and disaster recovery. Backed by its world-leading submarine and terrestrial cable resources and global network, CUE provides customers with integrated communication information solutions. A few days ago, according to the overall arrangement of China Unicom's 400G test network, under the planning guidance of the Network Department of China Unicom Group and China Unicom Research Institute, Guangdong Unicom and FiberHome Communications built the first C+L band 400G test network, and. China has officially leapfrogged global broadband standards by launching the world's first commercial 10G fiber broadband network in Suning County, Hebei Province.
