Coaxial Optical Fiber Sensor Company

Overview

Home Sensing Solutions FISO is a leading developer and manufacturer of fiber optic sensors & signal conditioners used in medical, energy, process control.

Key Takeaways

Leading companies in coaxial and fiber optic sensing include FiSens, FISO, AP Sensing, FOS Inon Optics, and NEC, offering advanced solutions for industrial, medical, and scientific applications. Key Companies and Their OfferingsFiSens GmbH specializes in fiber Bragg grating (FBG) sensor arrays and fiber-integrated spectrometers. Their sensors provide high multiplexing capability and maintain signal integrity in harsh environments.

Fi

Sens products are used in applications ranging from smart fan blades and bridge monitoring to tactile medical instruments, emphasizing precision and reliability in compact designs.

FIS

O develops fiber optic sensors and signal conditioners for medical, energy, process control, and R&D applications. They provide expert guidance for selecting appropriate sensors and support deployment in laboratories and industrial environments, with a strong presence in Asia.

A

P Sensing focuses on Distributed Fiber Optic Sensing (DFOS) solutions, leveraging advanced photonics for asset protection and monitoring. Their technology is widely applied in industrial and infrastructure projects, offering long-term reliability and efficiency in challenging conditions.

FO

S Inon Optics offers custom fiber optic solutions, including precision fiber bundles, sub-15µm mechanical parts, and optical sensors. Their products are engineered for aerospace, industrial flame monitoring, spectroscopy, and medical applications.

FO

S emphasizes German-engineered quality, ISO 9001: 2015 certification, and tailored solutions for high-precision requirements.

NE

C provides optical fiber sensing technology that can utilize existing communication fiber networks as sensors. Their systems detect vibrations, temperature, and sounds over long distances without requiring new fiber installation, integrating AI technologies to analyze large-scale sensor data for applications like equipment failure detection.

Applications

These companies' coaxial and fiber optic sensors are used in: Structural health monitoring (bridges, buildings, wind turbines)Industrial process control and energy monitoringMedical devices and minimally invasive diagnosticsSpectroscopy, laser systems, and analytical instrumentationDistributed sensing for long-distance infrastructure monitoringSummaryFor businesses or researchers seeking coaxial optical fiber sensors, these companies provide a range of solutions from customized precision assemblies to large-scale distributed sensing systems, combining high accuracy, durability, and advanced data analysis capabilities.

Depending on your application—industrial, medical, or scientific—each company offers specialized expertise and technologies to meet demanding requirements.

Article Content

Top Companies in Distributed Fiber Optic Sensors 2034

What are the top companies in distributed fiber optic sensors market? Key players include Tekni-Plex, DuPont, Amcor, Berry Global, and UFP Technologies, each contributing through material innovation

Our Technology

Prisma Photonics solutions monitor the most critical infrastructure using existing optical fiber, which is turned into a distributed acoustic sensor, extending for hundreds and thousands of kilometers.

Distributed Fiber Optic Sensing Solutions | AP Sensing

Based on a proven track record our Distributed Fiber Optic Sensing (DFOS) solutions ensure reliable asset protection even in the most challenging environments. We have established ourselves as the

Cutting-Edge Fiberoptic Sensing | FiSens GmbH

FiSens develops, manufactures, and markets accurate fiberoptic sensor solutions based on fiber Bragg grating (FBG) sensor arrays and fiber-integrated spectrometers.

Fiber Optic Sensors | KEYENCE America

Learn all about various sensors—including fiber optic sensors, photoelectric sensors, laser sensors, and contact sensors—with detailed information on

Fiber Optic Sensing Solutions Company

Hawk Fiber Optics can assist you with all your needs as a fiber optic sensing solutions company. This revolutionary technology can protect assets, equipment, and perimeters. HAWK''s Fiber Optic

Fiber Optical sensors for Industrial applications

Fiber optic solutions for industrial applications: temperature, pressure, displacement, strain by Opsens Solutions. Contact us.

Coaxial Cable Distributed Strain Sensing: Methods, Applications and ...

Fiber optic distributed strain sensors have been the widely adopted approach in this field, but their use is limited to lower strain applications due to the fragile nature of silica fiber. Coaxial

Research on dual wavelength coaxial optical fiber sensor for detecting ...

© 2026 EXF OPTICAL NETWORKS - All rights reserved

Li researched dual wavelength coaxial optical fiber sensor for detecting steel ball surface defects. Chen developed a real-time system for inspecting surface defects of precision

Research on Dual Wavelength Coaxial Optical Fiber Sensor for

To detect the surface quality on a steel ball effectively, dual wavelength coaxial optical fiber sensor technology is applied in this paper, and the defects are quantified as the characteristic ...

High Resolution Coaxial Displacement Sensor Using Small Diameter Fiber ...

A fiber coaxial displacement sensor based on the chromatic confocal method has been released that replaces the triangulation distance measurement method that has been the mainstay of

Fiber Optic Sensors | KEYENCE America

Fiber optic sensors are compact because the detection circuit is located in the amplifier, allowing for detection even in narrow spaces. Installation and

Factory Wholesale Coaxial Optical Fiber Sensor Ffrc-310 Threaded

Factory Wholesale Coaxial Optical Fiber Sensor Ffrc-310 Threaded M3 with CE, Find Details and Price about M3 Fiber Sensor and Optical Sensor from F&C Sensing Technology (Hunan) Co., Ltd.

Research on dual wavelength coaxial optical fiber sensor for detecting ...

Abstract The defects on a ground steel ball surface are very tiny and almost invisible; the existence of the defects will extremely influence the working stability of bearing system. To detect the surface

A novel optical dual sensor based on a coaxial electrospinning method ...

A novel optical dual sensor, utilizing a core (O 2) and shell (NH 3) fiber structure, was easily fabricated using the coaxial electrospinning method, showcasing simultaneous sensing

Optical Fiber Sensors: Working Principle, Applications, and Limitations

Brief theory of sensing principle, fabrication method, applications, advantages and disadvantages of the different fiber-optic sensors, are addressed. Recent progress in numerous

Coaxial Fiber Optic Cable Fiber Optic Sensors

Fiber optic sensors detect the presence of objects using highly focused light transmitted through a fiber optic cable and detected with a light sensor. Due to the light''s tight focus, they can detect subtle or

© 2026 EXF OPTICAL NETWORKS - All rights reserved

Fiber Optic Temperature Sensing and Measurement

Measure temperature with fiber optic sensors for high-resolution distributed and multipoint monitoring in batteries, processes, and harsh environments.
