Color of 24-core optical cable

Overview

Fiber Optic Color Code: The Ultimate TIA-598-C Guide Master the TIA-598-C fiber optic color code standard. Read our complete guide and use our free interac.

Key Takeaways

24-core optical cables use a standardized 12-color sequence repeated for fibers 13–24, often with stripe markings to distinguish the second set.

Standard Fiber Color Sequence

For 24-core cables, the first 12 fibers follow the TIA/EIA-598-C standard 12-color sequence: BlueOrangeGreenBrownSlateWhiteRedBlackYellowVioletRoseAqua The next 12 fibers (13–24) repeat the same 12-color sequence but are distinguished with stripes or markings to maintain unique identification. For example, fiber 13 is Blue with a stripe, fiber 14 is Orange with a stripe, and so on. In some designs, fiber 20 may be a natural (uncolored) fiber with a black stripe to differentiate it from the first 12 fibers (Blue through Aqua) (Wolontek, Prysmian).

Outer Jacket and Tube Colors

Outer jackets can vary depending on fiber type and manufacturer. Common colors indicate fiber mode: Single-mode (OS2): YellowMultimode (OM3/OM4): Aqua or Magenta/PurpleBuffer tubes inside the cable may also be color-coded to help identify groups of fibers. For 24-core cables, a single tube may contain all 24 fibers, or two 12-fiber tubes may be used, often with blue and orange binder threads to separate the groups (Prysmian).

Practical Notes

The 12-color sequence ensures technicians can quickly identify fibers and avoid miswiring. Stripe markings on fibers 13–24 are essential for high-density cables to maintain unique identification. Custom jacket colors are possible for OEM or project-specific requirements, but the internal fiber color sequence typically follows the standard for consistency (Wolontek).

By following this system, 24-core optical cables maintain clear, standardized identification for installation, maintenance, and troubleshooting in both indoor and outdoor fiber networks.

Fiber Optic Color Code: The Ultimate TIA-598-C Guide

Master the TIA-598-C fiber optic color code standard. Read our complete guide and use our free interactive calculator to easily identify 1-144 core cables.

All Fiber Color Code Charts in One Place (download

Many sources will offer color code charts of cables up to 576 fibers, which are usually 24 tubes * 24 fibers. With a standard color designation – 12

Fiber Color Code Guide: Latest EIA/TIA-598 Standard

Learn the latest EIA/TIA-598 fiber color codes for jackets, inner fibers, and connectors. A complete guide for accurate fiber identification.

Fiber Optic Color Code Explained | Complete TIA/EIA

Learn the full fiber optic color code system with TIA/EIA-598-C charts. Includes 12-fiber colors, 24/48/72-fiber sequences, jacket colors, connector

Fiber Color Code: A Simple Guide for Beginners (2024)

For cables with less than 12 strands of fibers, each fiber will be identified with 12 colors. For cables with over 12 strands of fibers (such as 24

Color Code Guide For Fiber Optic Specifications

Tubes with 24 uniquely colored fibers: Fibers 1 to 12 use the standard blue through aqua color sequence. Fibers 13 to 24 use black dashes on the same 12 fiber color sequence except for fiber 20

Fiber Optic Color Code Guide: How to Identify 12 to 144 Core Cables

© 2026 EXF OPTICAL NETWORKS - All rights reserved

For 24-fiber cables, tubes are color-coded (blue tube containing fibers 1-12, orange tube containing fibers 13-24). Each tube contains fibers in the 12-color sequence. For 48, 72, 96, 144, and

Fiber Optic Color Codes for Fibers, Tubes and Connectors

Fiber color codes are the standardized color sequences used to identify optical fibers, buffer tubes, cable jackets, and connector types across all optical communication networks.

Color Arrangement Rules For Optical Fiber

Indoor fiber optic cables, especially those with a lower fiber count (typically 6, 12, 24, etc.), often use tight-buffered fibers. These fibers are color-coded individually following the standard

Fiber Optic Cable Color Code: Complete Installation

This comprehensive guide covers the complete TIA-598-C color coding standards, including fiber optic cable jackets identification, connector

Your Sustainability Transformation Partner | Fujitsu Global

Our purpose: Make the world more sustainable by building trust in society through innovation.

Fiber Optic Splice Enclosure, Optical Fiber Splice Box IP68 ...

Fiber Optic Splice Enclosure, Optical Fiber Splice Box IP68 Waterproof Horizontal for Pipeline (24 core) : Buy Online at Best Price in KSA - Souq is now Amazon.sa: Electronics Suitable for overhead,
