There are five different IEEE specifications for the transformers and enclosures market. distribution board coating,coating color of box,panel board color,painting color of box,epoxy coating color for distribution boxelectronic color sample Share This Story, Choose Your Platform!By 2025, the coatings used in North America on transformers and enclosures is expected to be nearly $110M. All options shown are rated for outdoor use and come in a smooth high gloss. Yes, it is safe to engage in circuit breaker box painting, but only if you take the necessary precautions. Avoid painting over labels or vents, as neglecting these steps could lead to overheating or pose a danger. Remember. In a transformer the heat must pass from the conductors- and core iron through the insula tion, oil, the steel case, and the paint coating. The thickness of the paint will add only an infinitesimal amount to either the length of the path or the combined thermal resistivity of the material through. However, it is perfectly acceptable to paint the exterior of any electrical panel.
