Copper Rod Small Busbar Support

Overview

Insulating busbar supports to mount copper or aluminium busbars, tested to hold them securely during a short circuit. This material eliminates risks in relation to isolation distances and leakage lines. Our Busbar Supports are standardized with a fire protection rating of UL 94 V0 and type-tested according to DIN EN 61439-1. Insulators • Polyester without halogene. Adjustable interphase 454 General Catalogue 2022 Busbar supports dgewise mounting with adustable interphase Selection. Copper Development Association is a non-trading organisation that promotes and supports the use of copper based on its superior technical performance and its contribution to a higher quality of life. Its services, which include the provision of technical advice and information, are available to. The Geniflex® Busbar Support is based on a modular design and uses only one type of screw to ensure maximum flexibility and time savings.

Busbar supports

It defines the optimum busbar configuration depending on the electrical characteristics of the panel, in compliance with standard IEC 61439-1. It runs in a Windows®

Busbar supports

Busbar supports with adjustable interphase. Respecting the maximum distance between two supports ensures that the busbar supports are able to withstand the given short circuit current values. At these

Copper for Busbars

The use of copper for the busbars to which these parts are connected therefore avoids contacts between dissimilar metals and the inherent jointing and corrosion problems associated with them.

SPS Busbar Support

High safety and load capacity: Despite its simple installation, Geniflex® ensures secure and firm fastening of your copper busbars, even with high short-circuit

Busbar supports

It defines the configuration of the busbar system, including bar section and distance between supports, according to the required electrical characteristics of the panel in compliance with standard IEC
