# Core Switch Brand H3C

## Overview

H3C switches provide high-throughput, low-latency forwarding performance ideal for: With multigigabit/10GE/25GE/40GE/100GE capabilities and powerful switching fabrics, H3C ensures consistent performance even in demanding cloud, virtualization, and large-scale. H3C switches provide high-throughput, low-latency forwarding performance ideal for: With multigigabit/10GE/25GE/40GE/100GE capabilities and powerful switching fabrics, H3C ensures consistent performance even in demanding cloud, virtualization, and large-scale. H3C UniServer R6900 G6 server, running a full load of 777 high-load virtual machines, achieved a performance score of 13,880 points, setting a new record. H3C's sub-brand Aolynk, designed specifically for SMB (small and medium-sized business) in global markets. An ultra-compact, palm-sized AI. H3C provides an extensive, innovative, and enterprise-focused range of network switches designed to meet the evolving demands of modern digital infrastructure. From next-generation cloud data centers to enterprise campus networks, branch offices, smart buildings, and SMB deployments, H3C switches. After over 20 years of networking innovation, research and development, H3C has accumulated significant industry-leading Ethernet-related intellectual property and numerous patents. With a range spanning ten series and hundreds of switches, H3C's options can cover your networking needs – from the. The H3C S7503X, part of the H3C S7500X switch series, is designed for next-generation enterprise core networks. This advanced switch supports high-density, high-performance environments, and delivers unparalleled reliability and scalability. Tailored to meet the needs of contemporary enterprise. The S7500E series has become one of the best-selling product series since its release nine years ago; The update of the proprietary H3C operating system from version V5 to V7 provided a new leap in popularity for the S7500E series switches thanks to the following features and advantages: Increased. In the new generation of cloud data center and smart campus scenarios, H3C new generation of intelligent, ultra-wideband, simple, and integrated network is created for users, which is applicable to various scenarios and network sizes. CLOS+ multi-grade multi-plane architecture, midplane free.
