Direct Sales of Cable Tray Suspension Frames

Overview

Eurostrut Cable Trays | cable tray, cable route and NATO trayCable trays for industrial and marine use. Includes distribution trays, cable routes and NATO.

Key Takeaways

Cable tray suspension frames and complete cable management systems are available for direct purchase from suppliers like Eurostrut, Direct Channel, Gripple, Wibe Group, and Atkore, offering a range of trays, baskets, brackets, and accessories for industrial and commercial installations.

Key Suppliers and Offerings

Eurostrut provides a wide range of cable support systems, including cable trays, ladders, protective tubes, and associated suspension accessories. Their products are designed for demanding environments such as offshore, chemical, petrochemical, and energy sectors, with fast delivery from stock via their webshop and technical support for installation and custom solutions. Direct Channel offers light, medium, and heavy-duty cable trays in pre-galvanized and hot-dipped galvanized finishes, with widths from 50mm to 600mm and lengths of 1m or 3m.

They also supply basket trays, ladder racks, cable trunking, galvanized conduits, and a variety of suspension accessories like threaded rod hangers, trapeze systems, and brackets, all manufactured to British Industry Standards. Gripple specializes in pre-engineered cable tray and basket suspension kits that simplify installation. Their systems allow tool-free adjustment, reduce the need for cutting rods or struts on-site, and are up to 80% faster to install than traditional methods.

They offer wire or rigid bracket-based solutions suitable for ceiling voids or exposed service installations, with technical support for project design and take-offs. Wibe Group provides perforated and non-perforated cable trays suitable for industrial and commercial environments, including vertical and horizontal mounting options. Their trays accommodate accessories and are available in various surface treatments for corrosive environments, including GRP trays for highly demanding conditions.

Atkore offers steel wire cable trays in multiple depths and widths, along with medium and heavy-duty cable ladders. Their products are adaptable, lightweight, and allow on-site modifications without compromising strength. Accessories such as TALON cable cleats provide support, strain relief, and protection during short-circuits.

Considerations for Direct Purchase

Material and Finish: Choose trays and suspension frames based on environmental conditions (e.g., galvanized steel for corrosion resistance, GRP for highly corrosive areas). Load Capacity: Ensure the suspension system supports the weight of cables and accessories. Installation Ease: Pre-engineered kits with tool-free adjustment can reduce labor time and on-site modifications.

Availability: Suppliers like Direct Channel and Eurostrut maintain extensive stock for prompt delivery. Technical Support: Many suppliers provide design assistance, installation instructions, and custom solutions to meet project-specific requirements. For direct sales, contacting these suppliers via their websites or sales teams allows you to obtain quotes, check stock availability, and receive technical guidance tailored to your project.
