Distribution Box KLX

Overview

KLX type low-voltage distribution box is suitable for three-phase three wire, three-phase four wire, and three-phase five wire systems with AC voltage of 400V and below in various power industries. Used for power lighting distribution and control. This product has the characteristics of flexible. Boeing carries products from over 250 of the top manufacturers in the aviation industry. Boeing Distribution and Spectrolab, a subsidiary of The Boeing Company, are working together to expand access to Spectrolab's market-leading high-intensity airborne searchlights. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. This guide covers all main types, key components, and their primary functions.
