Do I need to replace my fiber optic router again if I ve already upgraded

Overview

When the technology upgrade is complete, we will need to add equipment to your individual unit and may need to exchange your personal router at no cost to you. We will notify you when it is time to schedule an appointment to complete the service upgrade. Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. That's because it won't be Wi-Fi 7 compatible and is likely causing a bottleneck. You'll notice this as latency in critical apps, especially if your home is device heavy. Please review the FAQs below to learn about. Does an ONT ever need to be upgraded?
