Dominican Single-Mode Fiber Optic Transceiver

Overview

The 100GBASE-DR Single Lambda QSFP optical transceiver module is designed for use in 100GBASE Ethernet throughput up to 500m over single mode fiber (SMF) using a wavelength of 1310nm via duplex LC connectors. Singlemode Fiber Optic Transmitters, Receivers, Transceivers are available at Mouser Electronics. Operating at a 1310nm wavelength, the module supports the 1000BASE-LX/LH standard, enabling data transmission up to 20 kilometers over a duplex LC interface It. SFP (Small Form-factor Pluggable) transceivers are essential components in modern fiber optic networks, enabling network devices such as switches, routers, and servers to transmit and receive data over optical fiber. By converting electrical signals into optical signals—and vice versa—SFP. Altronix P1SM10 are hot-pluggable SFP fiber transceiver modules and are readily usable with all Altronix Spectrum fiber optic equipment for 1G transmission rates. The P1SM10 is to be used with Single-Mode Fiber for distances up to 20Km.
