FCPC Fiber Optic Patch Cord

Overview

Designed for use with lasers from 450 – 1650nm in 1m, 2m and 5m standard lengths, these Single Mode Fiber Optic Patchcords are ideal for applications including beam delivery, microscopy, and telecommunications. Each connector is engraved with the fiber type for easy integration. This fiber has a TECS coating that acts as a second cladding with an NA of 0. 22 NA between the core and glass cladding. Thorlabs offers multimode circular-core step-index fiber optic patch cables with FC/PC connectors with ceramic or stainless steel ferrules on both ends. Many devices used in data transmission, sensor technology, medical technology, control tasks, and industrial applications are equipped with FC-type connectors – either with a physical contact (PC) or angled physical contact (APC) polish – for the interconnection of optical fiber components or. Single Mode Fiber Optic Patchcords are available with FC/PC or FC/APC terminated connectors. This fiber provides high stability and reliability and has a simplex form factor that encompasses optical fiber with connectors. Standard SMA-905, FC/PC, FC/APC, ST, or custom ferrules deliver light to meet the specifics of your instrumentation and equipment. With virtually no limit on length.
