Fiber Optic Connector Technical Specifications

Overview

US Conec''s MMC connector is a Very Small Form Factor (VSFF) multi-fiber optical connector designed for termination of single-mode and multi-mode fiber cables up to 2.5 mm (nominal) in outside diameter.

Key Takeaways

Fiber optic connectors are precision devices designed to join optical fibers with minimal signal loss, featuring specific ferrule sizes, coupling mechanisms, insertion loss, return loss, and durability standards.

Key Components and Specifications

Ferrule: The ferrule is a cylindrical component that aligns the fiber cores precisely. Common ferrule diameters include 2. 5mm for SC and FC connectors and 1.

25mm for LC connectors, with MPO/MTP connectors accommodating multiple fibers in a rectangular ferrule. Ferrules are typically made of high-precision ceramic to minimize misalignment and signal loss. Coupling Mechanism: Connectors use different coupling methods: Push-pull (SC, LC) for easy insertion and removal.

Twist-lock bayonet (ST) for secure mechanical connection. Threaded screw (FC) for high-vibration environments. Push-pull latch with guide pins (MPO/MTP) for multi-fiber high-density applications.

Insertion Loss: High-quality connectors typically have an insertion loss ≤0. 3 dB, with ideal performance below 0. 1 dB, ensuring minimal signal attenuation.

Return Loss: Return loss measures reflected light; standard connectors achieve ≥50 dB, while angled physical contact (APC) connectors can reach ≥60 dB, reducing back reflections in sensitive applications. Durability: Connectors are designed for repeated mating cycles, often ≥1,000 cycles without performance degradation. Polishing Types: Connector end faces are polished to optimize signal transmission: UPC (Ultra Physical Contact): Flat polish for general use.

AP

C (Angled Physical Contact): 8° angle for low reflection, commonly used in RF video and GPON networks. Common Connector Types and ApplicationsSC (Subscriber Connector): Square body, push-pull latching, 2. 5mm ferrule, used in FTTH and telecom backbones.

L

C (Lucent Connector): Miniaturized 1. 25mm ferrule, latch mechanism, ideal for high-density data centers.

S

T (Straight Tip): Bayonet twist-lock, legacy and industrial applications.

F

C (Ferrule Connector): Threaded, high-precision, suitable for high-vibration environments like factories and railways. MPO/MTP (Multi-Fiber Push-On): Multi-fiber connectors for high-bandwidth, high-density networks, often used with ribbon cables in data centers.

Standards and Compatibility

Fiber optic connectors comply with international standards such as IEC 61754 and TIA-568, ensuring interoperability across manufacturers and network equipment. They are available for single-mode and multimode fibers, with performance optimized for specific transmission speeds and distances.

Summary

Fiber optic connectors are engineered for precision alignment, low signal loss, and durability, with specifications tailored to their application environment. Choosing the right connector involves considering ferrule size, coupling type, insertion and return loss, polishing method, and fiber type, ensuring reliable and high-performance optical network connections.

MMC Connector Product Solutions Guide

US Conec''s MMC connector is a Very Small Form Factor (VSFF) multi-fiber optical connector designed for termination of single-mode and multi-mode fiber cables up to 2.5 mm (nominal) in outside diameter.

Fiber Optic Connectors Specifications

Find Fiber Optic Connectors on GlobalSpec by specifications. Fiber optic connectors are used to align and join two or more fibers together to provide a means for attaching to, or decoupling from, a

ST Connectors and Accessories

The Amphenol 953 series Fiber Optic ST and STII connector utilizes a bayonet-style mating connector to provide a secure, Robust coupling mechanism. This features a push-to-turn

Fiber Optic Connectors | Products | Amphenol

The 109 connector line meets or exceeds the pertinent requirements of SMPTE standard 358M on harsh environment multi-channel fiber optic connectors

ST Fiber Optic Connector

ST Fiber Optic Connectors are widely used in fiber optic backbone and horizontal applications for high speed data transmissions. Multimode connectors provide a low cost, easy to terminate solution for

Fiber Optic Connectors | TE Connectivity

Our broad portfolio of optical fiber connectors includes several connector types including standard fiber connectors, LC connectors, and SC connectors. Build more reliability and flexibility into your design:

IEC Fiber Connector Standards for Optical Networks

Overview of IEC fiber connector standards covering interface types, endface geometry, and performance requirements for FTTH and data center networks.

LC Fiber Optic Connectors

LC simplex and duplex connectors are used for equipment cross-connects or interconnects in backbone, horizontal and work area applications for high-speed data transmissions.

SC Fiber Connectors

© 2026 EXF OPTICAL NETWORKS - All rights reserved

The connector shall be field-polished, ield-installable, and does not require a curing oven or proprietary tool to facilitate the termination of the fiber. The connector shall be available in single-mode or

The FOA Reference For Fiber Optics

We''re focusing on the fiber part of the installation but the FTTH home tech will have to know how to connect fiber, set up the ONT and connect all the subscriber''s

The FOA Reference For Fiber Optics

Fiber Optic Testing Testing is used to evaluate the performance of fiber optic components, cable plants and systems. As the components like fiber,

Fiber Panels, Modules & Cassettes

Explore CommScope''s efficient and scalable fiber splice panels designed for seamless connectivity. Accommodating LC, SC, and MTP/MPO connectors,

The FOA Reference For Fiber Optics

Passive loss is made up of fiber loss, connector loss, and splice loss. Don''t forget any couplers or splitters in the link. If the specifications for a type of system or network are not known, industry

Connectors for audio, video, fiber optic and industry

Neutrik is the leading manufacturer of audio connectors and receptacles. Neutrik produces XLR, plugs, jacks, speaker and power connectors, patch panels, 75 o...

UniFi 25G Multi-Mode Optical Module

SFP28 transceiver that supports 25G connections up to 100 m using multi-mode fiber with a duplex LC UPC connector.

MPO Connectors Are Essential in Data Centers | Fluke

Multi-fiber push on connectors, or MPOs for short, are fiber connectors comprised of multiple optical fibers. While defined as an array connector having more than 2

Fiber Optic Center
