Fiber optic splicing tray fully equipped with tray

Overview

The fiber optical splice tray for FHD® (FS High Density) series rack mount enclosure shall house and protect fiber optic splices, guarantee proper fiber cable management and bend radius control, and allow for clear labeling and logical organization of the fiber optic splices. Since the need for higher data rates and effective communication gets more robust, the utilization of optical fibers has become increasingly widespread across multiple spheres of. Fiber Splice Trays provide complete protection for delicate stripped fibers and splices for all types of fiber cable designs. All trays accommodate a wide variety of fiber splice holders and feature a clear polycarbonate cover for viewing of tray contents. A fiber optic splice tray is a type of device used to organize and protect the splices, or connections, between fiber optic cables. Holds fusion or mechanical splice sleeves.
