Fiber Optic Switch 6700

Overview

The 64 GbHPE SN6700B Fibre Channel switch with ultra-low latency and unmatched 64 Gbps performance is a building block for modern infrastructures that simplifies deployment, configuration, and management of SAN resources in medium to large environments. It combines powerful analytics and advanced automation capabilities to accelerate data access, adapt to. Gen 7 Fibre Channel is the modern storage network infrastructure for mission-critical storage, enabling organizations to realize a self-learning, self-optimizing, and self-healing autonomous SAN. It combines powerful analytics and advanced automation capabilities to accelerate data access, adapt to. The HPE Storage Fibre Channel Switch B-series SN6700B is a high-performance, ultra-dense, highly scalable, and easy-to-use enterprise-class storage networking switch delivering Gen7 64Gb Fibre Channel (FC) capabilities. It is designed to support data growth, demanding workloads, and data center. We provide a wide range of PoE/PoE+/PoE++ switches with up to 90 W output per port to deliver high-speed data transmission while powering high-power devices over long distances. With an industrial-grade design, our PoE switches provide surge protection of 4 kV per LAN port.
