Fiber Optic Switch sys

Overview

Fiber optic switches, multiplexers and demultiplexers block or route optical signals in a fiber optic network. Fiberswitch 1x2 MM is a compact and flexible fiber switch that enables switching a fiber pair between two different channels, for example between separate sources, networks (red/black), or various destinations such as an additional monitor or projector. They are used in a wide range of applications, including telecommunications, data centers, industrial automation, and military and aerospace. Demultiplexers route a. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports.
