The MEINBERG fiber optic modules convert an electrical input signal (TTL or RS-422) into one or more FO (fiber optical) output signals or an FO input signal in one or more electrical output signals. The FO modules are suitable to spread signals like IRIG (AM / DCLS), PPS or RS232 over wide. SFP (Small Form-factor Pluggable) is a compact, hot-pluggable network interface module used to connect network devices (switches, routers, firewalls) to fiber optic or copper cables.
