Fully Enclosed Micro-Module

Overview

The integrated micro module adopts a fully enclosed cold aisle containment design, equipped with precision air conditioning, intelligent power distribution, UPS backup power, environmental monitoring and linkage fire protection systems. The Vertiv SmartRow 2 single row fully enclosed micro module product is designed with integrated standards, featuring high integration, high efficiency and energy conservation, reasonable architecture, safety and reliability, fast delivery, flexible deployment, intelligent monitoring, and unmanned. The Vertiv SmartRow 2-C single row fully enclosed micro module product is designed with integrated standards, featuring high integration, high efficiency and energy conservation, reasonable architecture, safety and reliability, fast delivery, flexible deployment, intelligent monitoring, and. The fully enclosed high-performance intelligent computing micro-module, through highly standardized server racks, advanced power configuration management, airow and heat management, and standardized prefabricated design, has unique advantages for achieving lA smart computing in high-performance. The modular architecture can be easily assembled on-site to complete business delivery, which can save 50% of the delivery time and personnel investment compared to the traditional construction mode, facilitating fast delivery and low carbon emissions. The robust IP54 rated cabinet provides environmental protection from harsh applications where dust and humidity could severely impact system performance and equipment. Near-end cooling and high-efficiency power supply. The average annual PUE of the netcol5E is less than 1.

FitDC Modular Data Center

The modular architecture can be easily assembled on-site to complete business delivery, which can save 50% of the delivery time and personnel investment compared to the traditional construction

Vertiv™ SmartCabinet™ ID | Integrated Solutions

The pre-integrated cooling module delivers either 3.5 or 7.0kW of scalable cooling capacity while allowing for full rack U-space utilization for increased IT deployment.

Integrated cabinet | Broadex Technologies

Near-end cooling and high-efficiency power supply. The average annual PUE of the netcol5E is less than 1.5.

New Sunpln Cold Aisle Containment Micro Modular Data Center

The integrated micro module adopts a fully enclosed cold aisle containment design, equipped with precision air conditioning, intelligent power distribution, UPS backup power,

EcoStruxure™ Modular Data Center | Schneider Electric

It consists of purpose-engineered modules and components that can be easily transported and assembled to meet specific data needs. Modular data center

Micro Data Centers / Mini Data Centers

The EdgeRack is a fully integrated enclosure system that provides power, cooling, management, and security in a small footprint. This turnkey solution is ready to be outfitted with your IT equipment and
