Galvanized iron sheet electrical distribution box

Overview

Galvanized sheet distribution boxes are widely preferred for their strength, longevity, and cost-effectiveness. An electric distribution box, also known as an electrical panel, circuit breaker box, or power distribution board, is a critical component in any electrical system. These enclosures house circuit breakers, fuses, and other protective devices that manage and distribute electrical power safely. Manufacture Galvanized Painted Industrial enclosures, junction boxes, designs in galvanized painted steel are robust and specifically developed for outdoor uses with environmental harsh conditions. The best price to be placed outside: -Corrosion resistance = 1000 hours salt spray test ASTM B117. There are 783 OEM, 707 ODM, 176 Self Patent. Our OEM/ODM services cover all-stage production from CAD design to precision fabrication, supporting stainless steel, aluminum, and carbon steel. In any electrical installation, the electrical box (also known as electric boxes, conduit boxes, outlet boxes, or junction boxes) is an essential component that provides a secure enclosure for wire connections, switches, outlets, and other fixtures.
