Gyfty cable 8b1 single-mode 8-core fiber optic cable

Overview

HAILE 8 Core outdoor non-metallic GYFTY-8B1 fiber optic cable HT215-8SC is a stranded single-mode optical cable designed for superior outdoor performance and durability. Engineered with advanced anti-strong electric breakdown technology, this cable ensures reliable, high-speed data transmission. GYFTY fiber optic cable, a premium all-dielectric (non-metallic) outdoor solution, is engineered to excel in high-lightning, high-electromagnetic interference (EMI) environments where traditional metallic-reinforced cables pose risks. Compliant with international standards including IEC 60794-1 and. GYFXTY cable is a 12 core Dielectric Fiber Cable. The unique second coating and stranding technology provide the fibers with enough space and bending endurance, which ensure good optical property of the fibers in the cable. is located in Zengcheng District,Guangzhou City, Guangdong Province. The cable tubes, which are filled with filling compound, are stranded around the FRP strength member. Then the aramid yarn is applied over water proof.
