High and Low Voltage Complete Equipment Module

Overview

This solution covers a complete set of power equipment from low-voltage distribution cabinets, high-voltage switchgear to transformers, automation control systems, etc., aiming to provide comprehensive and customized power solutions for various users. High voltage and low voltage complete sets occupy a significant place in modern electrical engineering as they are responsible for safe, secure, and efficient power distribution to all types of industries. The cable connectors in the tap boxes feature high-grade insulation. The switchgear mainly consists of two parts: the cabinet body and the removable circuit breaker handcart. The interior of the cabinet is divided into busbar compartment, circuit breaker compartment, cable compartment and low-voltage secondary instrument compartment, equipped with a comprehensive. Our high and low voltage complete electrical equipment solutions are designed based on a deep understanding of the current development trends in the power industry and accurate predictions of future power demand. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems.
