How to check the warranty status of an optical module

Overview

To check the remaining warranty coverage, use the warranty lookup link below and enter the serial number into the search field. ViewSonic Warranty Lookup For additional questions, please contact ViewSonic's Support by submitting a support ticket HERE or by Phone: US: 800-688-6688 . You can use the display commands to view information about the optical module on an interface, including conventional information, manufacturing information, and alarm information about the optical module. When the optical module on an interface is faulty, you can run the following command to view. This guide gives a practical, CLI-focused workflow for checking SFP health and diagnostics on Cisco switches, shows the exact commands you'll use, explains what the numbers mean, and compares OEM (Cisco) vs third-party modules so you can pick the right SFP module supplier for reliability and cost. By checking module health, compatibility, and digital diagnostics, you can quickly confirm correct installation, detect optical problems, and maintain accurate hardware. Execute the following command to view detailed interface and optical module status: show interface The output includes interface rate, module type, link state (UP status is required for normal module operation), and traffic statistics, all of which assist in. The Warranty Finder tool determines the Cisco warranty currently applicable to a product ID or product family. Follow the link and type in your Cisco Product ID (PID). The 10-digit serial number (or 11-digit for projectors) is located on the device's label, between two asterisks.
