Industrial Rail-Mounted Switches

Overview

DIN rail mounting is practically the default installation method for industrial switches. The switch clips directly onto the rail. Our Industrial Ethernet Switch portfolio comprises Managed and Unmanaged Switches with Gigabit, PoE, IEC 61850 certification, and for DIN rail mounting. This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. With flexible PoE options of IEEE 802. 3bt. With robust, reliable, secure networking and low-latency, high-bandwidth communications, Cisco® DIN rail industrial switches help build the infrastructure necessary to support AI applications and accelerate innovation in demanding environments.
