Installation Dimensions of Concealed Electrical Box

Overview

Standard electrical box dimensions for European concealed wiring systems are typically 80mm in diameter and 55mm in depth, complying with EN 60670 standards to ensure compatibility and safe installation across EU countries. Whether you are installing outlets, switches, lighting fixtures, or junction connections, box size directly affects wire fill capacity, device fit, and installation quality. This guide explains. Within electrical installations regulated by NEC and UL standards, the terminology surrounding junction boxes extends well beyond simple measurements of length and width. Choosing the proper enclosure requires fluency in the language of gangs, physical footprint, and—most importantly— internal. Clariannt's metal concealed box is designed to provide a reliable and safe housing for electrical wiring and components. Crafted from high-quality galvanized iron (GI), our metal electrical box ensures exceptional durability, corrosion resistance, and structural integrity.
