Lc duplex interface

Overview

A duplex LC connector is a fiber optic connector configuration that combines two LC connectors in a single paired interface.

Key Takeaways

An LC duplex interface is a fiber optic connector that combines two LC connectors in a single unit, enabling simultaneous bidirectional data transmission.

Overview

The L

C duplex connector is a compact fiber optic interface designed for high-density networking environments such as data centers and telecommunications systems. "LC" stands for Lucent Connector, originally developed by Lucent Technologies, and "duplex" indicates that the connector houses two fibers side-by-side, one for transmitting (TX) and one for receiving (RX) optical signals. This design allows full-duplex communication, which is essential for Ethernet and telecom links.

Key Components

Ferrules: Two 1. 25 mm ceramic ferrules precisely align and protect the fiber cores, ensuring minimal insertion loss.

Body/

Housing: A durable plastic shell secures the ferrules and internal springs, protecting the fibers from damage. Latch: A push-pull clip allows easy insertion and removal, even in crowded panels. Boot: Protects the cable at the exit point, reducing strain on the fibers.

Duplex Clip: Holds the two LC connectors together, forming a duplex pair for simultaneous TX/RX operation. Variants and FeaturesUPC (Ultra Physical Contact): Flat polish, return loss ~ -50 dB, typically color-coded blue.

AP

C (Angled Physical Contact): 8° angled polish, return loss ~ -60 dB, used in CATV and DWDM systems.

Uniboot L

C: Both fibers in a single jacket to reduce cabling bulk.

Polarity-

Reversible L

C: Allows easy TX/RX swap without re-termination.

Pull-tab L

C: Extended tab for easier access in dense panels. ApplicationsLC duplex connectors are widely used in: Data centers: High-density patch panels and server interconnects. Telecommunications: Optical transport networks requiring bidirectional communication.

SFP/SFP+/SFP28 modules: Small form-factor pluggable transceivers for 1G, 10G, and 25G Ethernet. Their small form factor allows for efficient space utilization, neat cable management, and high port density, which is critical in modern high-speed networks. They are compatible with both single-mode (SMF) and multimode fibers (MMF), making them versatile for various network infrastructures.

Advantages

Compact size for high-density environmentsReliable push-pull latching mechanismLow insertion loss and precise fiber alignmentSupports full-duplex communicationCompatible with multiple fiber types and transceiver modules In summary, the LC duplex interface is a critical component in modern fiber optic networks, providing reliable, high-speed, bidirectional communication while optimizing space and cable management in dense networking environments.

What Is an SFP Duplex LC Connector in Fiber Networks

A duplex LC connector is a fiber optic connector configuration that combines two LC connectors in a single paired interface. Each connector terminates one optical fiber, allowing

LC Duplex Connectors in Modern Fiber Networks:

Expert guide covering LC duplex connector types, polarity reversal methods, cost-control checklists and 25-year procurement strategy for data

Understanding the Duplex LC Connector: The Go-To

A duplex LC connector is a fiber optic connector that links two optical fibers together in one unit. The “LC” stands for “Lucent Connector,” which is

Simplex vs Duplex LC Connector Engineering Explained

Duplex LC connectors mechanically pair two simplex LC connectors into a unified assembly, preserving fixed spacing and polarity between the two

What is the difference between lc and duplex lc?

LC is a single connector, while duplex LC consists of two LC connectors housed in a single housing. Both connectors offer reliable and efficient fiber optic

LC Fiber Optics: Guide to LC Connectors, ULL Cables,

LC (Lucent Connector) is the world''s dominant duplex optical interface, used across enterprise networks, telecom infrastructure, and especially

Fiber Connector Types

However, the widely used types are about a dozen of fiber optic connectors, which can be divided into single-fiber, duplex fiber connectors (such

Understanding the LC Duplex Connector: A

A: An LC Duplex Connector is a small form factor (SFF) fiber optic connector used in high-density situations. It has two fibre connections in a single

100G QSFP28 ER4 40KM LC Optical Transceiver (EML)

100G QSFP28 ER4 LC optical transceiver delivers reliable 100GbE transmission up to 40km on single-mode fiber, compliant with IEEE 802.3ba standards. This hot-pluggable module features low power

100G QSFP28 ER4 60KM LC Optical Transceiver (EML)

© 2026 EXF OPTICAL NETWORKS - All rights reserved

Get 100G QSFP28 ER4 60KM LC Optical Transceiver (EML) from ETU-Link Technology CO .,LTD,we supply excellent QSFP-eER4-100G 60km. Long using life,high performance,wholesale at factory price!

100GBASE QSFP-100G Modules Data Sheet

The Cisco QSFP-100G-SR-S Module is a pluggable optical transceiver with a duplex LC connector interface supporting link lengths of 70 and 100 meters on laser-optimized OM3 and

Hilink 10Gbps XFP Optical Transceiver with 80km Reach Duplex LC

Hilink 10Gbps XFP Optical Transceiver offers reliable 80km reach with duplex LC connectivity and digital diagnostic monitoring capabilities, fully RoHS compliant.

Generic Compatible 50GBASE-SR SFP56 850nm 100m Duplex LC

OverviewThe Generic Compatible 50GBASE-SR SFP56 is an optical transceiver module designed for 50Gbps data transmission. It utilizes an 850nm VCSEL laser source and supports link lengths of up

1G SFP LX 1310nm 20km Single mode Transceiver

Generic SFP-1G-LX Compatible 1000BASE-LX/LH SFP 1310nm 10km-20km Transceiver supports 1G gigabit Ethernet throughput over singlemode fiber

StarTech LC to LC Coupler 10 Pack, OS2 Single Mode SC Footprint LC ...

StarTech LC to LC Coupler 10 Pack, OS2 Single Mode SC Footprint LC Fiber Optic Coupler without Flange, LC/APC Duplex Adapter buy at discounted prices. Great Prices and nationwide

Duplex LC Connector: Design, Fiber Types, and Best

Learn everything about Duplex LC connectors: design, UPC vs APC, single-mode vs multimode, polarity, plenum vs riser jackets, and installation tips.

Cisco 400G QSFP Transceiver Modules Data Sheet

The Cisco QSFP-400G-FR4 module provides duplex single-mode fiber connectivity using LC connectors and wavelength multiplexing technology, supporting reaches up to 2 kilometers

Understanding the Duplex LC Connector: The Go-To Fiber Network

Q: What is a Duplex LC Connector, and why is it considered a go-to solution for fiber networks? Q: What are the critical differences between simplex and duplex fiber connectors? Q:
