Lebanon Telecom Backbone Fiber Optic Cable Tender Information

Overview

Fiber Optics Lebanon Technical work includes the installation of active street cabinets, and the connection of primary fiber optic cabling to OGERO central.

Key Takeaways

OGERO and the Ministry of Telecommunications oversee Lebanon's fiber optic backbone tenders, including FTTX infrastructure projects and supply of cables and devices. Overview of Fiber Optic Projects in LebanonLebanon's fiber optic expansion is part of the FTTX (Fiber to the x) project, initiated by the Ministry of Telecommunications and OGERO in June 2018. The project aims to upgrade broadband infrastructure by deploying Fiber-to-the-Home (FTTH) and Fiber-to-the-Cabinet (FTTC) networks, ensuring minimum internet speeds of 50 Mb/s.

The project is executed in three phases, covering both urban and remote areas, and involves installation of active street cabinets and primary fiber connections to OGERO centrals. The infrastructure also supports private internet and data service providers, enabling advanced services like IPTV and video-on-demand.
