Level 3 Distribution Box 160a

Overview

DISTRIBUTION BOX 160A Robust, durable 160A metal distribution cabinet with padlockable doors. Used to provide a stable, risk-free power supply for an elect.

Key Takeaways

A Level 3 Distribution Box rated at 160A is a high-capacity electrical distribution solution available as modular terminal blocks, DIN rail-mounted units, or full metal distribution cabinets for industrial and commercial use.

Overview

A 160A distribution box is designed to safely redistribute electrical power from a main supply to multiple circuits while providing protection for connected devices and users. These boxes are commonly used in industrial, commercial, and construction environments to manage high-current loads up to 160 amperes. Types and ConfigurationsDIN Rail Terminal Block Distribution BoxesCompact, modular design for mounting on DIN rails.

Typically made with flame-retardant shells and copper connection materials for durability and insulation. Example: Tyenaza UKK-160A supports 1 input terminal (1x70mm²/1x16mm²) and 6 output terminals (6x16mm²), with a transparent cover for easy inspection.

T

E Connectivity DBL160 offers a touch-proof, modular design suitable for solar inverters and industrial equipment, eliminating the need for bus bars or isolators.

Full Metal Distribution Cabinets

Robust, padlockable cabinets for indoor or outdoor use. Can be single-phase, three-phase, or tetraphase, redistributing power to multiple sockets or terminal blocks. Equipped with circuit breakers, fuses, and grounding for safety.

Customizable with differential breakers, various connectors, and terminal strips to meet specific installation requirements. Modular Terminal BlocksSingle-pole, multi-way blocks for high-capacity control panels.

DI

N rail-compatible for easy installation and maintenance. Example: 160A brass distribution terminal block with 8 ways, designed for reliable performance in control panels.

Key Features

Rated Current: 160AVoltage Rating: Up to 1500V DC for certain models (e.g., TE DBL series)Materials: Flame-retardant nylon, copper terminals, iron-coated screwsSafety: Touch-proof design, circuit protection, grounding, and padlockable doors for cabinetsInstallation: Surface-mounted, flush-mounted, or DIN rail-mounted depending on model ApplicationsPower distribution in industrial machinery and commercial equipmentConstruction site power managementSolar inverter and renewable energy systemsControl panels requiring high-current modular distributionSummaryA Level 3 160A distribution box provides flexible, safe, and high-capacity power distribution.

Depending on your needs, you can choose between compact DIN rail-mounted terminal blocks, modular industrial blocks, or full metal distribution cabinets with extensive protection and customization options.
