Light source power meter apo

Overview

The APM-PWR-APO is a highly visual, easy to configure, digital power meter. Compact and portable, our light source and optical power meter tools are essential for testing and verifying insertion losses in fiber links across various networks, including cable TV, enterprise, service provider, carrier, Ethernet, and FTTH networks. It offers multi-measurement capabilities for voltage and current (L-L and L-N). Walk into any fiber test gear catalog and you will see "LSPM kit" listed alongside power meters, light sources, and OTDRs. Ideal for single-. The APM Power Meter is an energy meter for single, split, or 3-phase networks: 0-600V AC (L-L), 10-300V AC (L-N), 0-10,000 kA via CT, and 45-65Hz. It is a panel-mounted power meter designed for use on transformers and main circuits.

Contractor Series Light Sources and Power Meters

Contractor Series Light Sources and Power Meters are rugged test instruments designed with a simple user interface and backed by an industry-leading 5-year warranty.

Optical Power Meter & Stabilized Light Source Kits

The Tempo Communications optical power meters are available in standard and high-power versions for the Telco and MSO markets. Absolute and referenced

Optical Power Meters

VIAVI offers fast, cost-effective, and easy-to-use power meters for installation and maintenance of single mode and multimode fiber optic networks and advanced, photonic-layer power meters for lab and

APM-PWR-APO | TRUMETER | Power Meter

The APM-PWR-APO is a highly visual, easy to configure, digital power meter. Supply is 100 to 277V AC, configuration is completed by free APM configurator software and standard USB lead.

How to: Reference a Power Meter and Light Source

In order to perform loss testing using an optical power meter and an optical laser source, one must first "reference out" the test cables in order to provide an accurate result. This very simple ...
