Magnetic Compatibility Light Tracking Module

Overview

The Magnetic Track Light system features sleek, compact profiles into which LED modules snap into place magnetically—no tools, no wires, no hassle. A magnetic track lighting system is a low-voltage (usually 48V DC) lighting track that lets you snap different light fixtures in and out using built-in magnets. Instead of screwing fixtures to the track, magnetic modules —like linear lights, spotlights, and pendants—lock into place magnetically and. Discover GREENEARTH's 48V magnetic track lighting system — ultra-slim surface-mounted tracks, 5mm mini series for display cases, and high-efficiency modular light engines. Ideal for modern interiors, retail, and commercial environments. Compatible with multiple dimming systems. If you're working with KNX, DALI-2, Casambi, or Zigbee, you know the pain. You can install this track on concrete, drywall/gypsum, and modular grid ceilings — without. The Ultimate Freedom of Light Alton Ray's Magnetic Systems represent the future of architectural lighting. Choosing a suitable magnetic track rail.
