Manufacturer of upgraded cold aisle fiber optic installation tools

Overview

CommScope features a family of tools and components for the installation, repair and maintenance of fiber cables, including prep and termination kits.

Key Takeaways

Jonard Tools, TE Connectivity, Corning, Condux International, and Glenair are leading manufacturers of advanced fiber optic installation tools suitable for cold aisle environments.

Jonard Tools

Jonard Tools offers a wide range of fiber optic tools and kits designed for professional technicians, including mid-span slit and ring tools, thermal strippers, and ultrasonic cleaners. Their MS-446 Mid Span Slit & Ring Tool is ideal for thick-walled cables, while the TSAB-40 Thermal Stripper handles difficult coatings with adjustable heating up to 200°C. Jonard Tools emphasizes durability and lifetime warranties, making them suitable for high-performance data center installations.

T

E ConnectivityTE Connectivity provides professional installer kits that include tools for fiber optic terminations, epoxy curing ovens, and accessories for both epoxy and epoxyless connectors. Their tools improve consistency and efficiency in fiber terminations, which is critical in controlled environments like cold aisles.

Corning

Corning supplies fiber optic accessories and tool kits for installation, including cable access tools, polishing films, cleaning accessories, and replacement parts. Their products are designed to support precise and reliable fiber optic installations in high-density environments.

Condux International

Condux International specializes in fiber optic cable installation equipment, including cable pulling and blowing tools. Their products are suitable for long-haul and fiber-to-the-premises installations, providing reliable solutions for structured cabling in data centers.

Glenair

Glenair offers industry-standard fiber optic termination and inspection tools, including complete kits for field and factory use. Their tools cover all aspects of fiber termination, cleaning, and inspection, including Dry Action Cleaning Tools and high-resolution video bore scopes. These tools are particularly useful for maintaining fiber performance in cold aisle or high-density rack environments.

Summary

For upgraded cold aisle fiber optic installations, these manufacturers provide comprehensive solutions: Jonard Tools: Mid-span access, thermal strippers, ultrasonic cleanersTE Connectivity: Termination kits, epoxy curing ovensCorning: Cable access tools, polishing and cleaning accessoriesCondux International: Cable pulling and blowing equipmentGlenair: Termination, inspection, and cleaning kits Selecting tools from these manufacturers ensures reliable, efficient, and precise fiber optic installation and maintenance in cold aisle or data center environments.
