Middle East High Voltage Cable Tray Manufacturer

Overview

Arabian International is a leading manufacturer specializing in high-quality slotted channels designed for diverse industrial and construction applications.

Key Takeaways

Leading Middle East manufacturers of high-voltage cable trays include West Port Middle East, Unigroup, Delta Cable Trays, ADHWA, and MASEICO, offering durable, certified, and industrial-grade cable management solutions. Key Manufacturers and Offerings1. West Port Middle East (UAE) West Port specializes in industrial cable support and containment systems designed for high-voltage and control cables in factories, refineries, warehouses, and process plants.

Their product range includes heavy-duty ladder cable trays, galvanized slotted channels, industrial cable trunking, and wire mesh cable trays. These systems are engineered to resist vibration, corrosion, heat, and environmental stress, ensuring operational continuity and electrical safety in demanding industrial environments. 2.

Unigroup (UAE) Unigroup manufactures high-performance cable trays, trunking, and channel systems in Dubai, Abu Dhabi, and Sharjah. Their offerings include perforated trays, ladder-type trays, wire mesh/basket trays, and GRP (Glass Reinforced Polyester) systems. These products are designed for corrosion and fire resistance, ease of installation, and long-term reliability, meeting international standards for load and safety performance.

3. Delta Cable Trays (UAE) Delta, part of TRANSCON Global Group, is a pioneer in UAE cable support systems since 1998. They provide ladders, trays, trunking, conduits, wire baskets, and strut systems.

Delta focuses on precision-engineered, corrosion-resistant solutions for airports, metro stations, substations, refineries, and commercial towers. Their advanced manufacturing facilities in Ajman ensure high-quality, durable, and safe cable management systems. 4.

ADHW

A (KSA & Middle East) ADHWA supplies a broad range of cable tray systems including ladder-type, channel-type, and solid or ventilated bottom trays. Materials include aluminum, mill-galvanized steel, hot-dipped galvanized steel, stainless steel (304/316), painted, PVC-coated, powder-coated, and epoxy-coated finishes. Their trays are suitable for power, control, and signal cables, supporting intermediate to long spans and providing grounding capabilities.

5.

MASEIC

O (Jordan) MASEICO manufactures cable trays, ladders, supporting materials, cable glands, earthing, and lightning protection systems. Their products comply with international standards and are widely used in industrial, building, petrochemical, power, oil, and gas projects across the Middle East. The factory in Amman ensures accessibility and efficient distribution, while their engineering team provides customized solutions for site-specific conditions.

Considerations for High-

Voltage Applications

Material Selection: Stainless steel, hot-dipped galvanized steel, and GRP are preferred for corrosion resistance and durability. Load Capacity: Ladder and perforated trays are suitable for heavy high-voltage cables. Certifications: Ensure compliance with international standards for electrical safety, fire resistance, and mechanical load.

Installation Support: Many manufacturers provide engineering support for customized layouts and site-specific installations. These manufacturers collectively cover the Middle East region, offering robust, certified, and industrial-grade cable tray solutions suitable for high-voltage and critical infrastructure projects.
