MPO optical cable 144

Overview

144 Fiber (12x12) Multimode (OM4) MPO Cable with MPO (Male)-MPO (Male) connectors. 15ft) for 40G/100G 50/125 (OM4) fiber optic links Type: For 40G/100G Networks - MPO Polarity Method A (Straight-through) - Key-up to Key-down (Polarity B or C optional) . 144 Fiber MPO Cables are most often used in the consolidation of cabling infrastructure originally intended for 10G transfer rates. The harness style construction of high density MPO cables allows for the reduction of individual assemblies while retaining the versatility of connecting to 12 fiber. Fiber indoor cable, OptiSPEED ® Plenum MPO Trunk, 144 fiber multi-unit with 12 fiber subunits, Multimode OM1, Gel-free, Feet jacket marking. They use round cable to optimize routing flexibility and industry-standard MPO connectors to simplify system design. Usually, one MTP®/MPO connector has 8, 12, 16, 24 or 32 fibers, which makes these fiber cables perfect for applications that require huge bandwidths. MPO is the high dense degree of optical fiber pre-connect system,which is generally use in three areas. Fiber-Mart's MPO fiber patch cable is compliant to IEC-61754-7 and TIA-604-5 (FOCIS-5) standard.
