Network cable trays at the top of the server rack

Overview

Wire mesh trays are the preferred choice for data cables. Their open structure improves airflow and allows easy cable access without disassembling the tray. Ladder trays are better suited for power cables because they handle heat dissipation and provide the physical separation. SmartRack® SRCABLETRAY safely routes cables across the top of an enclosure. It offers toolless mounting to the top. Streamline your IT and network setup with overhead cable management solutions from Server Racks Online. Designed for efficient cable routing and organization, our selection includes cable trays, ladder racks, and overhead brackets that help maximize floor space while maintaining a tidy and. In server rooms and data centers, multiple power and data cables connect servers, switches, and networking equipment within rack systems. For IT professionals and facilities managers responsible for keeping infrastructure. If you've ever had to snake cables through a cramped server room, you'll understand why wire mesh cable trays have become so popular. Also called basket trays, they're lightweight, bendable, and easy to cut to fit odd corners.
