New type of mesh cable tray

Overview

The new heavy-duty mesh cable tray of type SGR, made of 6 mm-thick wire in a U profile, combines many advantages all at the same time. Manage cables with an open overhead system that's designed to handle heavy loads, easy to install on the jobsite and a more flexible option than traditional conduit systems. Tested at every stage of the process, Wire Mesh Cable Tray has performed in a wide variety of applications, from heavy power. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. We also. Wire Mesh Basket Cable Tray – Stainless Steel or Electro-Galvanized Options with Flexible Routing The E-Line TLS series Wire Mesh Cable Tray systems allow easy cable exit through the spaces in the mesh structure—downward, to the right, or to the left. Unlike traditional formed trays, wire mesh trays rely on distributed wire intersections for strength rather than solid rails or rungs.
