Optical Power Meter Red Light Integrated Unit 918

Overview

918D-IR-OD3R - MKS/Newport - The 918D-IR-OD3R Germanium Photodetector for low optical power measurements. Features include integrated calibration-dataThe all new Model 1830-R Optical Power Meter is a completely redesigned optical meter, replicating much of the functionalities and specifications of the legacy 1830-C Model. The 1830-R is a perfect drop-in replacement for your existing 1830-C, which was also the most popular Newport meter used in. Optical power measurement kit, consisting of a visual optical continuity fault locator, a laser light source and an optical power meter. Measurement and verification of optical fibre installations. The triple laser light source transmits on the 1310/1490/1550 nm wavelengths. This product family was designed to extend the utility of the 818 series detector family. The 819 series detectors include sensing electronics to provide feedback to the. The RoHs-compliant 918D series photodiode sensors are calibrated photodiode sensors with advanced features that improve performance. It features include integrated calibration-data storage, built-in OD2 attenuation filter with automatic On/Off detection, temperature sensing electronics for temperature drift compensation and is compatible.
