Overload Protection Intelligent Distribution Box

Overview

The low-voltage distribution box supports surface-mounted/flush-mounted installation, offering high safety performance. It integrates functions such as overload protection, short-circuit protection, leakage protection, metering, and intelligent control. In conjunction with our cloud-based electrify charging management system (eLMS) you have the option of setting up individual controls entirely. The PE8208 eco PDU is intelligent PDU s that contains 8 AC outlets and is available in various IEC or NEMA socket configurations. It provides secure, centralized, intelligent, power management (power on, off, cycle) of data center IT equipment (servers, storage systems, KVM switches, network. The electronic overload and short circuit monitoring LOCC-Box meets the requirements for selective shutdown with high cable impedance and integration into the existing communication level. It stands for a new generation of Industry 4.
