Price List of Cable Trays in Israel

Overview

Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation.

Key Takeaways

Cable tray prices in Israel range from $2 to $25 per meter, depending on material, type, size, and installation complexity.

Price Overview

The average cable tray price per meter in Israel varies widely based on material and design. Common materials include galvanized steel, stainless steel, aluminum, and plastic, with galvanized steel being the most cost-effective and stainless steel the most expensive due to corrosion resistance and durability requirements. Typical tray types include ladder, perforated, solid-bottom, and wire mesh, each affecting the price differently.

Installation Costs

Installation adds approximately $10 to $30 per meter, depending on labor rates, tray complexity, and additional components such as supports, brackets, and connectors. Complex installations in high or hard-to-access areas may increase costs further.

Bulk Orders and Project Pricing

For large-scale projects or bulk orders, prices can be significantly lower, with potential 20%–40% discounts for high-volume purchases. Importing trays from international suppliers, such as China, can reduce costs by 30%–50%, though shipping and compliance with Israeli standards must be considered.

Market Considerations

The Israeli cable tray market is mature and technically demanding, driven by construction, energy, telecommunications, and industrial projects. Regulatory compliance, including electrical safety (SI 1015) and building codes, is critical when selecting trays. Demand is concentrated in Tel Aviv, Jerusalem, Haifa, and industrial zones in the north and south.

Cost-

Saving Tips

Opt for perforated or wire mesh trays for lightweight applications to reduce material costs. Consider pre-galvanized or powder-coated trays for moderate corrosion resistance at lower cost than HDG or stainless steel. Plan for bulk procurement to leverage volume discounts.

Evaluate local suppliers to minimize shipping and import costs. In summary, for a standard project in Israel, expect $2–$25 per meter for the tray itself, plus $10–$30 per meter for installation, with potential savings for bulk orders or material selection. Contacting local suppliers with your project specifications will provide the most accurate quote.
