Distribution box prices vary widely, typically ranging from $50 for basic residential units to several hundred dollars for commercial or industrial models, depending on specifications and features.

Price Ranges

Residential Distribution Boxes: Basic single-phase units generally cost $50–$150, while more advanced three-phase systems for larger homes or small commercial setups can reach $200–$400 depending on amperage and circuit capacity. Commercial and Industrial Boxes: Prices increase significantly due to higher durability, larger capacity, and advanced control systems, often ranging from $300 to $1,000+ per unit. Fiber or Optical Distribution Boxes: Specialized enclosures for telecommunications or fiber networks, made from high-strength, weather-resistant plastics, typically cost $100–$300 depending on size and features.

Material and Construction: Corrosion-resistant metals, high-grade plastics, and weatherproof designs increase cost. Capacity and Specifications: Voltage rating, amperage, number of circuits, and modularity influence pricing. Smart Features: Integration with monitoring systems, remote control, and energy management can add to the upfront cost but provide long-term savings.
